## Conferences Are Calculated to Promote Unity in Action

### Huge Hematite Paint Deposit at Stonewall

Congressman Chas. R. Evans announces that Nevada is to have a new industry. The hematite deposit 52 miles south from Goldfield, owned by Mr. Evans and Ellsworth Oldt will be turned over to the Red Indian Metallic Paint company, which will be immediately incorporated under the laws of Nevada.

Although hematite deposits of iron are scattered over the west the only one known to be suitable for metallic paint is that mentioned here. Exhaustive tests have been made by some of the large paint houses, and all pronounce this to be the highest grade hematite, suitable for paint body known to exist anywhere in the world. The iron content averages about 63, silica negligible, manganese is absent, the only other element of note being oxygen.

### DRY LAWS MAY DESTROY CIDER

(By Associated Press) SPOKANE, Wash., June 17.—Danger that the manufacture of cider, one of the principal by-products processes of the fruit industry in the Pacific northwest, may suffer practical extermination through the very factor that promised to give it national importance—prohibition—is seen by C. H. Feilberg, a cider manufacturer of this city. State laws forbidding alcohol in cider, Mr. Feilberg says render it almost impossible for the manufacturer and the dealer to stay within the legal limits, and place them at the mercy of state and city officials. Within only a few days after its manufacture, he declared, fermentation progresses far enough to make the alcohol content greater than the one-half of one per cent permitted by the federal law. Many thousands of tons of apples that are useless for other purposes are used for the manufacture of cider every year in this city alone. Mr. Feilberg declared if these apples were thrown on the market, he said, they would bring down the price of higher grade apples, with consequent damage to the industry.
